RESEARCH INTERESTS

My research spans AI & Society and AI for Sustainable Development.

- **AI & Society:** connecting micro-level human–AI collaboration with macro-level social value representation. I study how people and AI interpret social information and make collaborative decisions, and how LLMs represent diverse societies, with a focus on geopolitical bias and pluralistic AI.
- **AI for Sustainable Development:** integrating physical processes, domain knowledge, and expert feedback into AI for environmental understanding. My work spans interactive geographic interpretation and physics-informed ocean forecasting, linking scientific modeling with expert practice and early warning of extremes.

EDUCATION

Beijing University of Posts and Telecommunications (BUPT) — **Beijing, China**
Ph.D. in Intelligent Science and Technology — *Sep. 2022 – Present*

- Advisor: Prof. Wei Wang; Co-supervisor: Prof. Yi Wang

Beijing Forestry University (BJFU) — **Beijing, China**
B.E. in Computer Science and Technology — *Sep. 2018 – Jun. 2022*

HONORS AND AWARDS

- **National Scholarship**, China 2026
- **First-Class Scholarship**, Beijing University of Posts and Telecommunications 2025
- **Deployed Application Award**, Innovative Applications of Artificial Intelligence (IAAI) 2024
- **First Prize, Beijing Division**, China Undergraduate Mathematical Contest in Modeling 2020
- **National Third Prize**, Chinese Mathematics Competitions 2019

SERVICES

Program Committee	AAAI (AI for Social Impact Track); NeurIPS BiAlign Workshop
Reviewer	NeurIPS; AAAI; ACL; IJCAI

TEACHING EXPERIENCE

- **Teaching Assistant**, Social Interactions and Computing Systems, BUPT Spring 2026
- **Teaching Assistant**, Modern Software Development Methodologies and Practices, BUPT Spring 2025
- **Teaching Assistant**, Research Methods in Software Engineering, BUPT Fall 2023
- **Teaching Assistant**, Reinforcement Learning, BUPT Spring 2023, Fall 2024
- **Undergraduate Thesis Supervision:** supervised four BUPT undergraduate theses; one received the university's Outstanding Bachelor's Thesis Award.
- **Course Development:** Social Interactions and Computing Systems, selected for BUPT's Branded Course Development Project for International Students (2027).

RESEARCH AND TECHNICAL SKILLS

Methods	Causal inference and empirical research; HCI study design and analysis; agent-based modeling.
AI and Modeling	LLM evaluation and agent development; computer vision; reinforcement learning; spatiotemporal modeling of remote-sensing data.
Systems	PyTorch, Scikit-learn; interactive AI systems and full-stack model services; Git, Linux, and Shell.
